Available for Immediate Joining

PROFILE SUMMARY

Highly analytical and results-driven Master of Computer Applications (MCA) graduate with hands-on experience in full-stack application development, backend system design, and performance engineering. Proven track record in designing BPMN-based workflow engines, building scalable Django REST APIs, and implementing robust observability pipelines using OpenTelemetry and ClickHouse. Strong expertise in optimizing SQL queries, executing distributed performance audits with Apache JMeter, and utilizing modern containerized microservices architectures (Docker) to deliver clean, production-ready systems.

SKILLS SUMMARY

Languages:	Python, JavaScript (ES6+), SQL, HTML5, CSS3
Frameworks & Web:	Django, React.js, HTML5, CSS3, RESTful APIs, MVC/MVT Architecture
Databases:	SQL, SQLite, Django ORM, ClickHouse
Tools:	Apache JMeter, OpenTelemetry, Docker, Git, GitHub, BPMN
Platforms:	Load Testing, Stress Testing, Performance Testing, Uptime Monitoring, CI/CD, Agile/SDLC
Soft Skills:	Communication, Collaboration, Problem-Solving, Critical Thinking, Ownership & Accountability, Adaptability, Continuous Learning

WORK EXPERIENCE

Full Stack Developer Intern LeMiCi IQ Private Limited	March 2026 - Present
- Engineered secure and optimized REST API endpoints using Python and Django, accelerating feature delivery within Agile sprint cycles. - Implemented end-to-end OpenTelemetry observability pipelines integrated with ClickHouse to capture and query real-time system logs and traces. - Optimized BPMN workflows using Camunda, improving cross-team task visibility and reducing manual workflow coordination overhead. - Executed Load, Stress, and Spike performance tests using Apache JMeter, ensuring system reliability and scaling capability pre-production. - Collaborated on Dockerized deployment pipelines and CI/CD workflows to ensure consistent application delivery across staging and production.	

PROJECTS

OpsFlow – Workflow & Operations Management Platform LINK	2026 - Present
- Architected a full-stack workflow automation platform using Django and React.js with BPMN-driven task coordination. - Designed a RESTful API layer managing workflow lifecycle state transitions, improving operational visibility and reducing latency. - Created ClickHouse database schemas to enable high-throughput search queries over structured telemetry trace data. - Containerized application components with Docker Compose for consistent, reproducible deployments in production environments.	
Django CRUD Web Application LINK	2025
- Developed a responsive Django application applying Model-View-Template architecture to perform complete CRUD capabilities. - Optimized relational database queries using Django ORM to speed up data transactions and loading. - Implemented secure authentication pipelines and MVC patterns to form a reusable backend foundation.	

EDUCATION

Master of Computer Applications (MCA)	Bangalore, India
Global Institute of Management Sciences (GIMS), Bangalore University , 75.30%	October 2022 - December 2024
Bachelor of Science (PMCs) – Physics, Mathematics & Computer Science	Mysore, India
JSS College for Women (JSSCW), Mysore University , CGPA: 7.62	June 2019 - August 2022

CERTIFICATIONS

Python Full Stack Course Pentagon Space CERTIFICATE	March 2024
- Certified in Full Stack Web Development: Python, Django, HTML/CSS, JavaScript, REST APIs, and database management. - Built Student Management System (1,000+ records) and database schemas applying Agile and API integration best practices.	
Python Full Stack Program JSpiders CERTIFICATE	January 2025
- Mastered Django: models, views, templates, URL routing, and ORM-based database design. - Developed 5+ scalable Django applications with advanced forms, secure authentication, and optimized databases.	

LEADERSHIP AND ACTIVITIES

- Event Host & Coordinator | Teachers' Day Celebration, JSS College for Women – Hosted and coordinated Teachers' Day event, demonstrating strong communication, public speaking, and planning leadership for 300+ guests.
- Project Lead | MCA Academic Projects – Led student development groups, establishing coding benchmarks, coordinating Git task branch commits, and driving collaborative problem-solving.

Declaration

I hereby declare that the information provided in this resume is true and accurate to the best of my knowledge and belief.
